

Landscaper Refunded \$20,000 by Reading THIS Article...

His highly-paid accountant was a little embarrassed they were “unaware of the tax credit.”

We published this original article on December 12, 2016. Then in early 2017, the refund checks totaled almost \$20,000 for Krisjan Berzins, owner of Kingstowne Landscaping. This is not a joke. Many highly paid accountants miss this strategy year after year after year. And if missed, it's costing YOU a fortune in overpaid taxes!

Anyone who owns a lawn, landscape, irrigation, tree service or snow removal business could claim their refund by using this method. Each and every detail is carefully explained below.

But before you read this article, I want to share the email conversation just as it unfolded in early 2017. It started when I sent this short email to my current & past clients in December 2016 with the subject line: **have you spoken with your accountant yet?** Here's the email:

Sent: Saturday, December 17, 2016 7:16 AM
To: Krisjan Berzins <Krisjan@kingstownelawn.com>
Subject: have you spoken with your accountant yet?

Krisjan,

The year end is near &... If you're profitable... you'll want to make a couple of year end maneuvers to lower taxes. But please...talk to your accountant now to lower (or even eliminate) your tax bill.

Here's a powerful article on the subject of LOWERING TAXES. Three clients recently reported item 1 created a \$3000 tax refund! Be sure to read it. [Continue reading by clicking here.](#)

I'll be in my office and available for calls a few days this week. If you have any questions, I'll be happy to answer. I am inside the office 8:30 - 5 pm EST. I spend about 80% of my day on the phone. So call when you have a minute. Or pick an open time from my calendar. [You can schedule an appointment to discuss your needs by clicking here.](#)

No charge for the meeting. Just do me a favor. If you schedule a meeting with me, please show up on time. Talk soon.
Profit Greatly, Tony Bass

[866-923-0027](tel:866-923-0027)

PS - Check our [special deals on DEMOs](#) here.
PPS - If you're looking for ways to improve daily operations, I'm holding a webinar later that shares simple steps to improve operations, better understand your equipment cost, and how to save money on your next work truck purchase. I'm holding a couple events this weekend. [CLICK HERE TO SIGN UP](#)

Merry Christmas and God bless you, your family and your business.

Unfortunately, many busy business owners skipped right over the email communication and failed to take action on my recommendations. But Krisjan Berzins took the time to read the article in its entirety. And boy oh boy was that a smart decision!

Let me share how Krisjan responded. As you will see below, he was a little skeptical that his high-paid accounting team might miss the tax credit strategy I shared with him in the article. Here's the next email confirming he shared this article with his accountant(s):

On Sat, Dec 17, 2016 at 10:47 AM, Krisjan Berzins <Krisjan@kingstownelawn.com> wrote:

Hi Tony,

Yes. I forwarded them the information that you sent me regarding the fuel tax credits. As you suspected, they were unaware of this opportunity. They are currently looking into it and I hope they hear back from them next week.

I'm looking forward to receiving my Super Lawn Truck! Can't wait!

Krisjan

A couple of months later, I followed up with Krisjan once again. I wanted to make sure he was holding his accountants accountable for claiming his refund. Here's my follow-up email:

From: Tony Bass [mailto:tony@superlawntrucks.com]
Sent: Friday, February 17, 2017 5:17 AM
To: Krisjan Berzins <Krisjan@kingstownelawn.com>
Subject: Fwd: have you spoken with your accountant yet? Fuel use data

Good Morning Krisjan,
I thought I should follow up.
Can you share how much your TAX REFUND is going to be?
Did you go back 3 years and amend returns?
Did your accountant charge you any extra money since they made this error?

Let me know what happened...OK?

And...
Thanks again for your business in 2016!

We're ready when you are to help you convert your fleet to Super Lawn Trucks as you're ready.

Tony Bass

www.superboxtruckramps.com

The reply I got a couple of days later confirmed to Krisjan that he should read every email I send him and every article I publish, because they provide access to powerful, profitable ideas. This little strategy put an extra \$20,000 in his bank account!

On Feb 19, 2017 5:12 PM, "Krisjan Berzins" <Krisjan@kingstownelawn.com> wrote:

Tony,

I sure did! They actually went back 3 years and adjusted each return. They also will be applying the same methodology to our 2016 returns. The total savings was nearly \$20K!

Thank you so much Tony. I sincerely appreciate your assistance with this.

Can't wait to get the new truck wrapped. I'll send you a couple photos as soon as its done.

Krisjan

Could You Be Overpaying Your Taxes?

The only way to know for sure is to read the article below, review your tax return and/or share this information with your accountant. You might not have a company generating millions in revenue each year like Krisjan. So your refund might be lower. But you might discover that your company has missed other tax deductions described in this article. And if you correct this mistake BEFORE you file your next tax return, you'll probably start an annual tradition that puts thousands of dollars in your pocket...just like Krisjan.

Before I share the article, here's the final email congratulating Krisjan on his big refund check!

Tony Bass <tony@superlawntucks.com>

to Krisjan

So Krisjan...
Congratulations on your refund.

It sure seems like you should hang out with me a lot more often!

There's much more where that came from! Thanks for letting me know the results.

Is there anything else I can do for you?
Let me hear from you.

Tony Bass
[866.923.0027](tel:866.923.0027)

I recommend you read the article that follows. I've updated a few things to keep this current for 2017. But please understand. Time is of the essence. Once December 31 passes, your big opportunity to lower your taxes for 2017 is OVER and gone forever!

I look forward to your comments.

Profit Greatly,

Tony Bass

P.S. – Just to be clear. This article is being provided as a courtesy to owners of lawn & landscape companies to help them put more money in their pockets. I don't provide tax advice. You should review these strategies with your accountant and see if they are right for you and your company.

Here's How To Legally Stuff An Extra \$22,014.63 In Your Pocket by Dec 31

When You Avoid These 4 Costly Mistakes Landscape Business Owners Make

Fellow business owner,

There's a number of highly educated people who do not want me to share this information with you. They'd rather keep you in the dark or charge you \$250 per hour to get this information. That's why it's critical that you read every word that follows. I'm about to give you step-by-step instructions to help you put more money in your own pocket and less in the fat bank account of the bureaucracy known as the Internal Revenue Service (IRS).

Before I share these step-by-step instructions, I must provide a clear disclosure. I'm not an accountant. I don't provide tax advice for hire. My goal in writing this letter is to simply inform you of your options as a business owner. You should consult a tax advisor before using any of these tactics. By writing you today I am fulfilling part of my goal to teach 10,000 landscape business owners how to double their profits or double their sales in 12 to 24 months. The best news is each of these techniques puts CASH in your pocket very fast! In fact, use tactics 1, 2 and 3 to lower your taxes \$22,014.63 (or more) in 2017... then do the same thing year after year... as long as you run your business!

Hello. I'm Tony Bass. I'm a consulting advisor and coach to the landscape industries top business owners. If you and I have not met personally, this letter may come as a total shock. You might ask yourself, **"Why would Tony provide the exact details of how you can immediately lower your tax bill by \$22,014.63 (or more) and not charge me one red cent? There must be a catch."** Well, I suggest you read this entire letter without putting it down and judge for yourself.

And by the time you get to page 2 you'll probably say, **"Why hasn't my accountant explained this to me?"**

Many of my most loyal clients (my clients are owners of lawn & landscape companies) had this question in the past. Once they learn these strategies from me, they manage their accountant relationship more effectively. They have learned (like you are learning now) to pay careful attention to important details in the tax code. Master these details! It pays handsome dividends year after year!

Now...If we have met... and you have been a student of mine for a few years, consider this communication as a courtesy reminder of past education. Make certain you are using all four of these tax reduction strategies in 2017 & beyond.

Mistake #1 – Failure to Claim Your Pre-Paid Tax Credits

The IRS owes you a refund! But it's up to you to claim it! If you own a lawn mower, weedeater, skid steer, tractor, dingo, back-pack blower or a stand on spreader/sprayer, it's highly likely you can lower your taxes with this strategy. It's called the **Off-Road Fuel Tax Credit**. One simple form and correct record keeping could save you hundreds or thousands of dollars each and every year for the rest of your life (or until this tax loophole is changed)!

It works like this. Each time you buy a gallon of gasoline at the retail pump, your company pays a federal highway tax. If you use this gasoline in a lawn mower, weedeater, skid steer, tractor, dingo, back-pack blower, or stand-on sprayer/spreader, it's highly likely you did not drive this equipment on the highway.

Therefore by using IRS form #4136 you can claim your pre-paid tax credit. **Heck, even if your company lost money this year, you can claim your tax refund with this strategy!**

Understand this important definition...a **TAX CREDIT** is a dollar for dollar reduction on ANY INCOME TAXES you may owe. Again, I'm not a CPA. But if you're not claiming this refund every year, you're definitely overpaying your taxes. The question becomes, "How much are you overpaying your taxes each year?" Keep reading...I'll show you...

Example 1: Let me share a simple example of how this works. Let's say that you own a 60-inch zero turn lawn mower. You track your hours of use for each year. In 2017, your company put 500 hours on the machine. You track your fuel consumption and you learn this machine burns 1.5 gallons of gasoline per hour. Here's the math:

$$500 \text{ hours} \times 1.5 \text{ gallons/hour} = 750 \text{ gallons of gasoline}$$

$$750 \text{ gallons} \times .183 \text{ cents/gallon} = \$137.25 \text{ Is Your Tax Credit Per Lawn Mower Per Year!}$$

If you have 10 similar lawn mowers, the tax credit becomes \$1,372.50. Over-paying your taxes is like a kick in the teeth. It hurts most AFTER it happens. Stop overpaying the IRS! This works for large or small companies. If you have just one lawn mower but use this tactic for the next ten years, you just added \$1,372.50 to your checking account. You get a pay raise without an ounce of more work!

Example 2: Let's consider the impact of this strategy if you own and operate a diesel-powered skid steer. You know the one I'm talking about? It's super fun to operate, does a ton of work and makes landscaping and hardscaping a lot of fun! Well, the diesel fuel you buy at the pump also has road-use taxes. Let's look at the math for a skid steer:

$$500 \text{ hours} \times 2.5 \text{ gallons/hour} = 1250 \text{ gallons of diesel fuel}$$

$$1250 \text{ gallons} \times .243 \text{ cents/gallon} = \$303.75 \text{ Tax Credit}$$

Example 3: Do you think this idea might help you lower your tax bill for 2017? You bet it will. And the more you track your fuel use, the more money you save on your taxes. I've got one more example for you. Consider the impact of fuel use in a back-pack blower. Here's the math:

$$500 \text{ hours} \times .75 \text{ gallons/hour} = 375 \text{ gallons of fuel}$$

$$375 \text{ gallons} \times .183 \text{ cents/gallon} = \$68.63 \text{ Tax Credit}$$

How many blowers, weed eaters, hedge trimmers, chain saws and gas powered two cycle equipment do you own? Hopefully you see that these numbers can really add up in a growing landscaping company. So do yourself a favor. Consult with your tax pro. **If they tell you the tax credit is a bad idea, go get a second opinion.** Many of my clients gladly claim \$1500 to \$3500 per year as a fuel tax credit! That's enough extra money to take your family on vacation...year after year after year after year!

I'd hate to know you made the same mistake one of my past clients made. He had access to this tax-saving information. He took it to his accountant. The accountant told him the special record keeping was not worth the tax credit. That's simply not true. The more your company grows, the bigger the tax refund! If you find road blocks in getting this tax credit for your company, call me. I'll refer you to an accounting firm that can coach you on a streamlined record keeping process that will make this tax credit as easy as pie. Don't overpay your taxes! **Here comes mistake #2.**

Mistake #2 – Failure to Fund Your Personal IRA, Simple IRA, 401-K or SEP

ALWAYS PAY YOURSELF BEFORE YOU PAY THE IRS! For those of you who run a really profitable business, this may sound like a very elementary tax reduction strategy. But just because you are aware of these tax-reduction techniques, it doesn't mean you maximize their impact on reducing your taxes. Let me give you a very simple illustration.

Johnny owns a contracting company. He works hard every day to provide his customers with top-quality workmanship and excellent customer service. His company is profitable at year end. He understands that he has a responsibility to plan for his family's financial future. **Therefore, he opens an Individual Retirement Account (IRA).** Johnny makes certain that he places the maximum allowable contribution to his IRA account of \$5500. Paying yourself first is a terrific wealth strategy! This becomes a tax-deductible expense reducing his taxable income by \$5500.

Here's the math:

$$\mathbf{\$5,500 \times 35\% \text{ federal tax} = \$1925 \text{ federal tax reduction}}$$

Depending on your personal income, your federal tax could be higher or lower. The higher your income, the more you save! If you have a state income tax like we do here in Georgia (6%) where I live, funding your IRA will lower your state tax liability as well. Here's the math:

$$\mathbf{\$5,500 \times 6\% \text{ state tax} = \$330 \text{ state tax reduction}}$$

Advanced business owners learn that by implementing a Simple IRA, 401-K or a SEP inside your company, can drastically lower your taxes by a factor of 2x to 4x on the numbers above. There are countless rules, regulations and requirements for company sponsored retirement accounts, so consult with your tax professional regarding this strategy. It's silly to overpay your taxes. As a business owner, the government gives you tools to lower your taxes. **Failure to use tools like these is just bad business.** You and your family can make much better use of YOUR money than the federal or state government.

Funding your personal IRA account for 10 years puts \$55,000 into your retirement account and saves you \$19,250 in federal income taxes along the way! PAY YOURSELF FIRST EVERY YEAR! And yes, if you live in a state with income taxes like Georgia's 6% income tax rate, you save an additional \$3300 in state taxes over that 10-year period!

If you're a business owner like me (and my loyal clients), you know it's tough to build up cash when you're re-investing profits into growing your company. **But when you LOWER your tax bill, you can easily afford to pay yourself first!** If you'd like help on advanced tax reduction strategies, contact me. I recently brought in the number 1 tax reduction CPA/Tax Attorney in the entire USA to teach these and many other tax reduction strategies to a small group of business owners. And the good news is every single minute of these tax strategies were captured in HD video. We can provide you immediate access to advanced tax reduction strategies. Now...get ready for mistake #3.

Mistake #3 – Failure to Maximize Your Section 179 Deduction

Essentially, Section 179 of the IRS tax code allows businesses to deduct the full purchase price of qualifying equipment and/or software purchased or financed during the tax year. That means that if you buy (or lease) a piece of qualifying equipment, you can deduct the FULL PURCHASE PRICE from your gross income. It's an incentive created by the U.S. government to encourage businesses to buy equipment and invest in themselves. So use this! **Invest in YOUR COMPANY GROWTH and lower your taxes!**

The section 179 depreciation deduction is currently set at \$500,000. You can thank President Obama and the Congress for making this permanent in 2015! There's a number of details and limits regarding proper use of section 179, but failure to use this deduction means you may be overpaying your taxes. Let's look at an example of the math regarding a section 179 depreciation deduction below.

Johnny decides he needs to replace an old truck in his company. He buys the new truck for \$55,000 using attractive financing to keep his payments as low as possible. By buying at year end (Dec), he spends little to nothing in the current year. Payments begin in the new year. Johnny is ready for the 2018 season and he enjoys a huge tax deduction on his 2017 tax return. Here's the math:

Purchase Price of Truck/Equipment - \$55,000
Section 179 Deduction - \$55,000 (check with your accountant to verify your situation)
Total First Year Deduction - \$55,000
Cash Savings Year One @ 35% Federal Rate - \$19,250
Actual Cost of the Truck/Equipment - \$35,750

Profitable businesses can use the section 179 tax deduction to legally pay Zero Dollars in taxes!

This special tax incentive is designed to encourage you to re-invest in your business. I love this tax loophole! It allows you to avoid paying taxes on up to \$500,000 of profits every single year! Check with your accountant. Section 179 is only available to BUSINESSES who purchase equipment for BUSINESS purposes!

I'd like to point out two important mistakes business owners make regarding equipment purchases. First, equipment doesn't last forever. Failure to update or replace your equipment leads to downtime in the field. **Downtime (labor cost) is MUCH more expensive than equipment payments.** Just look at your payroll each month and compare that to your equipment payments. Labor is your biggest expense. It always will be.

Speaking of labor cost...updating your equipment can lead to increases in productivity, employee retention or better positioning in your target markets. I've often been quoted as saying, **"If your equipment is broke...you're probably broke too!"**

So... don't think keeping an old truck will increase your profits. Paying cash for major repairs like engines, transmissions, rear ends and paint jobs suck cash out of your company in large chunks. This negatively affects your cash position. And it often seems like these expensive repairs come at the worst possible times – right in your busy season! Ughh!!

Fact: you'll rarely recover the cost of a replacement engine or transmission when you sell old equipment. Further, many banks will not finance equipment repairs. And understand this. Banks don't like to finance USED trucks that are over 10 years old. When equipment gets beyond ten years old, the market for that equipment gets dramatically smaller because the only buyers are CASH buyers. And cash buyers don't pay top dollar!

Here's a winning strategy to maximize your tax deductions & lower your equipment costs. **Sell your old trucks in year 8 or year 9 to maximize sales price.** Don't hold them for more than 10 years and you maximize your exit price. Use part of the proceeds from the sale for a down payment on the new equipment or stuff the cash from the sale in your pocket. But... buy new equipment and take full advantage of the tax loophole known as section 179 depreciation... as long as you operate a profitable company!

Purchasing or leasing DEMO models of Super Lawn Trucks can save you THOUSANDS! WE recently attended the Green Industry Expo in Louisville, KY. We built a handful of DEMO trucks to take to the show. Now they are for sell at discounted prices. Although these trucks have 1,500 to 2,000 miles on them, they have new warranties, attractive discounts and special financing rates just in time for year-end tax planning purchases. This opportunity for DEMO units only comes once per year. These special offers are available on a first-come-first-served basis.

You might like to know that we have a handful of USED Super Lawn Trucks we have taken in on trade. So, if you're the type of business owner who prefers USED trucks, contact us online at www.usedsuperlawntruck.com or via phone 866-923-0027. If you have an interest in replacing, upgrading or expanding your company fleet, my team and I would like to help you.

Mistake #4 – Failure to Continue Your Education

I began my career in business as a lawn and landscape contractor in 1987. I grew that little lawn company to three locations, earning millions in revenue. As a young business owner, I began to recognize the fact that my academic education in public schools and even my university degree, did little (or nothing) to help me understand the laws of money! The whole tax return and financial accounting process was confusing. I never had a "tax reduction class" in high school or college. Over time, **I developed a suspicious feeling I was overpaying my taxes.**

I'll never forget asking my accountant (after facing a huge yearend tax bill), **"What are you NOT telling me?"** I didn't know what questions to ask for crying out loud! My limited turfgrass and horticulture education did not teach me to ask about fuel tax credits, IRA deductions or section 179 strategies. And truthfully, she didn't know how to teach me what questions to ask! It was like the blind and dumb leading the blind and dumb! **And ignorance is expensive!**

Look, there's 73,000 pages (or more) of tax code. That's nearly impossible for one person to go through. And at tax time, the accountant was so backed up with OTHER bigger accounts, I could hardly get a meeting with her to review my situation. Think about it. How much motivation does your accountant have to try to lower your tax bill by \$1500 or \$15,000? Not much!

I learned that business owners have to take full responsibility for their education. And, as I grew my company, I could afford advisors with specific expertise inside my career field. Over the years, with an army of the best advisors in the world, I've unlocked dozens of additional tax-reduction strategies. There's no way I can go into all of them in this letter.

This brief report is a generous gift to help you reduce taxes even if we never work together. But if you'd like advanced tax reduction training, I've got a terrific advanced tax reduction training program ready for you. More on this later.

If Your Company Is NOT Super Profitable, You Don't Need Tax Reduction Training...YET!

Your #1 responsibility as a business owner is to **“Create and keep a customer... while making a desired profit.”** That's right. Taxes will become your #1 personal expense **IF** you operate an exceptionally profitable company. You don't pay taxes if you don't make money! Believe me... business is much more fun when you make money! Lots of money!

So, if you are not satisfied with your personal income, your business profits, your company benefits package, your ability to attract and keep good employees...well there's a reason for these problems. You need a well thought out financial plan for your future. You need more education! You need a money plan. A money plan that will:

- Identify ALL of your costs to open and operate your company for 12 solid months in a written organized manner
- Set a reasonable salary for you (and your spouse or partner)
- Establish an appropriate benefits package for YOU (and your employees if you like)
- Discover the correct hourly rates for the type of jobs you sell
- Correctly set the hourly rates for each and every piece of equipment you own, lease or rent
- Teach you how to apply fat, juicy profits to each and every job you bid
- Project the exact amount of money you need to retire comfortably at the time you choose
- Show you how to pay your employees fair wages, plan for pay increases and retain your best workers
- Reduce the chances that you over-price your bids, quotes or proposals on every job that you pursue
- Clearly establish your 12-month sales goal that will help you meet your personal income goals once and for all
- Set a clear profit goal for your company
- Help you identify the bad jobs and avoid them like poison ivy in the summer time
- Protect you from over-paying taxes and making poor business decisions
- Improve your insurance plans and LOWER the costs of your commercial insurance policies!

I'll help you build this money plan when you attend one of my live [Profit Builder Training](#) events. It's 100% true that I have personally taught over 300 owners of lawn and landscape companies how to double profits or double sales in 12 to 24 months using this “money plan” process. And, I'm ready to teach YOU...or you and your partner, spouse or business unit manager how to double your profits too.

Exceptionally Profitable Companies Know Their Numbers!

Lawn & landscape business owners who invest in their education get smarter year after year. Here's a photo of my students and I from our Dec 2017 Profit Builder training event.

Do You Really Need Advanced Financial Training?

You be the judge. I have two types of business owners attend my training events.

First, those business owners like I have described above...they want more money!

They want a more predictable future. They want a company that works FOR them...rather than BECAUSE of them. They want to get BETTER.

They are tired of having a sore back and a small bank account. They know the physical demands of outside lawn and landscape work will become a burden as they get older and they want a plan to get OUT OF THE FIELD one day.

These folks have limited or no formal training in financial/accounting, estimating or bidding. They love working...they LOVE being outside....they love the idea of being their own boss...but they tend to HATE paperwork! I love these types of students! I can turn their business profits and their lives around quickly!

If can relate to any of these descriptions above, I want you to join me soon. **Your future has more potential than you can possibly imagine!**

The **second** group of students are quite different. They already make a healthy profit in their company. They already have accounting training. They already have good financial records and they pay taxes every year.

So the reasons these students attend my training classes are different. These include: they are always investing in their training & personal development – they believe they can get better – they want a second opinion – they want to make certain they haven't made some small mistake in their current process that's costing them a fortune over time – and they love the chance to meet other non-competitive business owners who share their secrets when the doors are locked and competition is not around.

And one day...these successful business owners want to exit their company with a significant payday, **like selling their business for maximum profit or structuring their business for transition to the next generation.**

If you can relate to any of these descriptions above, I want you to join me soon. I'm prepared to help you uncover the missing details in your current systems and help you discover your full potential.

And yes...**Your tuition to attend the next Profit Builder Training event is a tax deductible expense!** So the government is picking up 35% or more of the costs of you attending the training!

Double Profits? Is It Really Possible?

Yes! Of course it is! Statistically... in contracting, 20% of your work COSTS you money. That is, 20% (1 in 5 jobs) of your work is underpriced to the point it takes cash out of your company checking account or it adds to your company debts. We can help you identify the 1 in 5 bad jobs you currently serve and eliminate them from your workload.

It's almost mathematical certainty that you will double your profits if you follow this process. In order to double your profits, you must make a commitment to Replace 1 in 5 Bad Jobs (jobs that cost you money) that have found their way into your company workload with Good Jobs that produce healthy profits. It's not back breaking work like digging a ditch. **But it does require mental focus.**

I explain exactly how to do this at the live Profit Builder seminars I hold in Atlanta, GA. In a 2 ½ day weekend event, we will teach you how to build a written budget (money plan) that pays you a respectable salary, a generous benefit plan, and a tax-saving retirement plan. We will provide you with correct hourly rates for your labor, accurate hourly rates for your equipment, and a detailed production rate based estimating process that prevents estimating errors and avoids bad jobs! Consider this your invitation!

Profit Builder is a small group training event (no more than 12 companies are allowed). I have designed it this way so that I can interact with everyone in the room, assuring that everyone completes their calculations, establishes their correct man hour rate and sales goal, & develops a complete understanding of SUPER important numbers when they walk out the door.

If you are like many of my other clients and keep wondering WHERE your money is going, and why you don't seem to be making as much as you'd like, then **Profit Builder** training is for you!

Past attendees have made these comments:

- ❖ *"Knowing my numbers is so empowering."*
- ❖ *"I've never had so much confidence in my estimating and bidding. Now, when I give a client a bid, I KNOW that it's right and I'm not afraid that it will cost me money."*
- ❖ *"If you want to be successful and profitable, you need to sign up and do this class."*

We currently have almost 100 company owners whom have shared their video testimonials about their experience attending my live training events here: www.superlawntoolkit.com/profit-builder. A recent attendee admitted to watching every single video before he registered to attend! That's fine with me...

YOU are the reason that I do what I do. I LOVE landscape business owners, and I want to help you become MORE PROFITABLE and a HUGE SUCCESS. It's my passion... it's my calling... and I love it. Helping business owners is what makes ME feel like a success.

So... get signed up... be my next success story! I'll help you along the way.

To Your Future Profit and Success,
 Tony Bass, Founder
 Super Lawn Technologies & Tony Bass Consulting

P.S. – I know you’re busy... all of us are... but how important is your company’s success to you? If you don’t PUT IN THE TIME... to WORK ON your business... you will remain in the cycle of working IN it and seeing little to no progress on Profits. You MUST step back, take the time to get away from your company, join other landscape contractors in the same place as you and get your financial plan FIGURED OUT!

All you need to do is select a date. Here’s what is available... the classes fill up soon so, choose a date and sign up quick!

Dec 2018, Jan, Feb & March 2019

You can register online here:

www.superlawntoolkit.com/profit-builder

The web form above makes it easy to register. Select the date that works for you!

All Profit Builder courses will be at the Hyatt Place Atlanta Airport South 1899 Sullivan Rd in Atlanta, GA. There is a free shuttle. You won’t need a rental car, and there are several dining options in or near the hotel. This keeps your travel cost low!

If you have any questions, Tabitha Lovell is our Profit Builder Event Coordinator. Here’s her contact info: tabitha@superlawntoolkit.com, 678-943-4856. If you prefer to fax in your registration form, you can do that too.

Looking forward to working with you very soon!

Profit Builder Training Event – Order Form

The **PROFIT BUILDER Training Program** is designed for company owners who would like to grow revenues or bottom-line line profits. If you are not satisfied with the amount of money you earn, the benefits you receive, or the yearly profits of your firm, you should enroll in this training right away. Participants will receive world-class training from an SLT landscape industry expert.
